

Electrical Part for Forklifts

Forklift Electrical Part - Forklifts can be specifically labeled to be used in unsafe places. A marked lift truck denotes the design has met the lowest requirements of ANSI/UL 558 for engine powered forklifts or ANSI/UL 583 used for electric trucks for the type of label placed.

The application for labels meant for lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas or Use, Maintenance and Operation, and Type Designations. Consult your local insurance provider and Fire Marshall for further information about the approved uses of industrial powered lift trucks in your application.

If the certain lift truck meets the outlined standards, labels may be put. A labeled forklift would show the type of designation placed on the nameplate and will have a properly corresponding label placed.
